

# **PW-625T6** powered by: 2806A-E18TAG2

### **DESIGN SPECIFICATIONS**

√High quality,reliable,long life and complete power unit. √ compact design.

√Easy start and maintenance possibility.

\*VEvery generating set is subject to a comprehensive test programme which includes full load testing and checking and proving of all control and safety shut down functions testing.

√Fully engineered with a wide range of options and

accessories: Electrical mechanical soundproof canopy and mobile units

Diesel Genset Features		P.F=0.8 3Phase	
Generating Set Performance		6	0Hz
Service		P.R.P	Standby
Rated output	kVA	625	688
Active power output	kW	500	550
Rated Speed	r.p.m	1	800
Standard Voltage	V	40	0/230
Voltage available	V	V 380/220-400/230 - 416/240	- 440/254 - 460/265 - 600/346 V

erforemance data refer to Standard Reference Conditions of ISO 8528:+25°C,100m ALT,relative humidity 30%

wer reduction acc.to DIN ISO 3046 Standard values: Above 100m ALT approx.1% per 100m. Above 25°C (77°F) approx.4% per 10°C (50°F).

Specific oil consumption(at full load)	%	<0.1	
Total coolant capacity	L	6	1
Speed governor	Туре	Electron	nic ECM

1)P.R.P. Prime Power - ISO 8528:PRIME POWER is the maximum power available during a variable power sequence, which may be run for an unlimited number of hours per year, between stated maintenance intervals. The permissible average power output during a 24 hours period shall not exceed 80% of the prime power. 10% overload available for governing purposes only.

Nax Standby power -ISO 3046 Fuel Stop power:Power available for use at variable loads for limited annual time (500h), within the following limits of maximum operating time: 100% load 25h per year, 90% load 200h per year. to overload available. Applicable in case of failure of the main in areas of reliable electrical network.

Synchronous Generator		
Manufacturer		Guericke
Model		GRK 500G4
Rated output		500
Poles	num	4
Winding Conections (standard)		Star-serie Star-serie
Insulation	class	Н
Enclosure(according to IEC-34-5)		IP23
Phases		3+N
Votage Regulaors		A.V.R (SX460)
Steady voltage precision		within±1.5% from no load to full loading with cosΦ=0.8-1.0
*Alternator used by GTL Gensets meet the requirements of following Standard:B	S5000, VDE0530, NEM	A MG1-32,IEC34,CA C22.2-100,AS1359

# Standard Control Panel -EPmaster EPM6

Protection, distribution, and automatic control panel, which starts the generator set when it detects a mains failure and stops it when the mains is restored with the control unit EPM6. It also starts and stops the group manually via a pushbutton or remote start-up by contact.

### It has the following:

Emergency stop push button

② Protections:

Circuit breaker (preheating resist.) 2P (16 A)

Protection fuses for control module ③ Voltage&speed trimmers

Battery charger
 DC switch

Working Lamp switch

⑦ Distribution:Direct output of the circuit breaker

® EPM6&EPM6+(cloud monitoring

communication 4G)control and protection centre

### EPmaster EPM6

t has a digital LCD screen, which provides easy reading of the information regarding the Engine, Alterator, Mains and Charging. The controller meets all requirements for Auto Mains Failure (AMF) applications including remote communication and internet control, user configuration and complete genset monitoring and protection.

#### Protection of the engine and alternator, with READINGS that can be made: Other characteristics: the ALARMS activated: Engine: cooling temperature/oil pressure/revolution speed Engine: low oil pressure/high coolant temperature/low and hi Event log, real-time clock, scheduled start & stop generator (can be set as start genset once a day/week/month whether with load or not). Maximu (rpm)/fuel level/battery voltage/battery alternator voltage/c gh battery Voltage./failure of the alternator to charge batteries rating hours/number of start Low fuel level. m 99 event logs can be memorized. With maintenance function. Types (date or running time) can be optional and actions ( Alterator: voltages between phases and between phases Alterator: /ow and high voltage/low and high frequency/overl nd neutral/frequency/phase sequence ever, warning, or shutdown) can be set when maintenance time out. Mains: frequency/voltages between phases and between Equipped with CANBUS port and can communicate with J1939 enginet. Not only can phases and neutral (L1-N, L2-N,L3-N)/voltages between phases and (L1-L2, L2-L3, L1-L3)/phase sequence Mains: over and under voltage and loss of phase monitor frequently-used data (such as water temperature, oil pressure, speed, fuel consumption and so on) of ECU machine, but a so control starting up, shutdown, raising speed and speed droop via CANBUS port RS485 communication interface enables "Three remote" functions Control of the set: (remote control, remote measuring and remote communication) according to MODBU S protocol STARTS and STOPS the set AUTOMATICALLY when mains Parameter setting: parameters can be modified and stored in internal FLASH memory failure is detected and when it is restored, respectively. It can and cannot be lost even in case of power outage; most of them can be adjusted using ront panel of the controller and also can be modified using PC via USB or RS485 port.

also operate MANUALLY and Auto Transfer Switch control

#### **Standard Configuration & Option** Item Standard Option Standard air filter Heavy duty air filter Standard fuel filter Air intake shutoff valve chalwin type tandard oil filter ntake air heater Low coolant level sensor Oil temperature sensor Exhaust gases compensator Diesel-powered heater 24V Electrical system Engine water heater Engine Radiator with bloweing fan Electronic governor ender WT ender OP Hot components and radiator guards Mobile components guards elf-excited and Self-regulated Air inlet filter IP23 protection degree P44/IP54/IP55 Insulation H class Space heater/anti-condensation heater Alternator Environment protection Temperature detectors Parallel operation Battery isolator switch Distribution board with sockets kit and power busbar 3 poles circuit breaker 4 poles circuit breaker Electrical system Door opening alarm Adjustable ELCB (Earth Fault) Battery charger 220-240V Grouding rod Water separator filter Diverter valve kit for external fuel tank Low fuel level alarm Automatic fuel refilling kit Accessories Oil extraction pump Trailer Residential silencer Tool kit for maintenance

# Generating Set transport data

### Dimensions(Open Skid Type) With Standard Fuel Tank

The complete gen-set is mounted on whole on a heavy-duty fabricated, steel base frame

Voltage/Speed potentiometer

- Antivibration pads are fixed between the engine/ alternator feet and the base frame;
- Base frame design incorporates an integral fuel tank.

  The generating set can be lifted or carefully pushed / pulled by the base frame;
- Dial type fuel gauge and drain plug on the fuel tank;
- Forklift pockets within base frame (up to 500kVA);

## Over All Size

Electric engine fuel heater

## Dimensions(Silent Type) With Standard Fuel Tank

All canopy parts are designed with modular principles.

Without welding assembly

All metal canopy parts are painted by electrostatic polyester powder paint.

Thermally insulated engine exhaust system.

Emergency stop push button outside of canopy. Easy maintenance and operation
