Standard Control Panel -EPmaster EPM4

Faceplate Controller Internal Structure Protection, distribution, and automatic control panel, which starts the generator set when it detects a mains failure and stops it when the mains is restored with the control unit EPM6. It also starts and stops the group manually via a pushbutton or remote start-up by contact It has the following: Emergency stop push button 5 ② Protections: 0 Circuit breaker (preheating resist.) 2P (16 A) Protection fuses for control module GCB Emergency Stop Button Optional: ATS ③ Voltage&speed trimmers Battery charger ⑤ DC switch ⑥ Working Lamp switch ⑦ Distribution:Direct output of the circuit breaker ⑧ EPM4&EPM4+(cloud monitoring communication 4G)control and protection centre

EPmaster EPM4 It has a digital LCD screen, which provides easy reading of the information in and internet control, user configuration and complete genset monitoring and		uirements for Auto Mains Failure (AMF) applications including remote communication
