

DESIGN SPECIFICATIONS

√High quality,reliable,long life and complete power unit.

√compact design. √Easy start and maintenance possibility.

√Every generating set is subject to a comprehensive test programme which includes full load testing and checking and proving of all control and safety shut down functions Tall load testing and criecking and proving or an control and safety shift down includes testing.

√Fully engineered with a wide range of options and accessories:Electrical,mechanical,

soundproof canopy and mobile units

⁽i)P.R.P. Prime Power - ISO 8528:PRIME POWER is the maximum power available during a variable power sequence, which may be run for an unlimited number of hours per year, between stated maintenance intervals. The permissible average power output during a 24 hours period shall not exceed 80% of the prime power.10% overload available for governing purposes only.

[@]Max Standby power -ISO 3046 Fuel Stop power:Power available for use at variable loads for limited annual time (500h), within the following limits of maximum operating time: 100% load 25h per year, 90% load 200h per year. No overload available. Applicable in case of failure of the main in areas of reliable electrical network.

Standard Control Panel -EPmaster EPM6/EPM6+

Protection, distribution, and automatic control panel, which starts the generator set when it detects a mains failure and stops it when the mains is restored with the control unit EPM6. It also starts and stops the group manually via a pushbutton or remote start-up by contact.

It has the following:

① Emergency stop push button

② Protections:

Circuit breaker (preheating resist.) 2P (16 A)

Protection fuses for control module

③ Voltage&speed trimmers

④ Battery charger ⑤ DC switch

Working Lamp switch

① Distribution:Direct output of the circuit breaker

® EPM6&EPM6+(cloud monitoring communication 4G)control

and protection centre

Power reduction acc to DIN ISO 3046 Standard values: Above 100m ALT approx 1% per 100m Above 25 T (77T) approx 4% per 10 T (50T).

FPmaster FPM6/FPM6+

It has a digital LCD screen, which provides easy reading of the information regarding the Engine, Alterator, Mains and Charging, The controller meets all requirements for Auto Mains Failure (AMF) applications including remote communication and internet control user configuration and complete genset monitoring and protection

READINGS that can be made:
<u>Engine:</u> ccooling temperature/oil pressure/revolution speed (rpm)/fuel level/battery voltage/battery alternator voltage/operating hours/number of start
<u>Alterator</u> :voltages between phasesand between phases and neutral/frequency/phase sequence

Mains: frequency/voltages between phases and between phases and neutral (L1-N, L2-N,L3-N)/voltages between phases and (L1-L2, L2-L3, L1- Mains: over and under voltage and loss of phase L3)/phase sequence

<u>Load:</u> Current(la,lb,lc)and each phase and total active power(kw)/reactive power(kvar)/apparent power(kva)/power factor/accumulated generator power(kwh,kvah,kvah)/output percentage with load (%)

Protection of the engine and alternator, with the ALARMS activated:

Engine:low oil pressure/high coolant temperature/low and high battery Voltage./failure of the alternator to charge batteries/Low fuel level.

Alterator: low and high voltage/low and high frequency/overload /short-circuit

Control of the set:

STARTS and STOPS the set AUTOMATICALLY when mains failure is detected and when it is restored, respectively.It can also operate MANUALLY and Auto Transfer Switch control

Other characteristics:

Event log, real-time clock, scheduled start & stop generator (can be set as start genset once a day/week/month whether with load or not). Maximum 99 event logs an be memorized.

With maintenance function. Types (date or running time) can be selected and actions (warning or alarm shutdown) can be set when maintenance time out

Equipped with CANBUS port and can communicate with J1939 enginet. Not only can monitor frequently-used data (such as water temperature, oil pressure, speed, fuel consumption and so on) of ECU machine, but also control starting up, shutdown, raising speed and speed droop via CANBUS port

RS485 communication interface enables "Three remote" functions (remote contremote measuring and remote communication) according to MODBUS protocol.

Parameter setting: parameters can be modified and stored in internal FLASH memory and cannot be lost even in case of power outage; most of them can be adjusted using front panel of the controller and also can be modified using PC via USB or RS485

Item	Standard	Option
	Standard air filter	Heavy duty air filter
	Standard fuel filter	Air intake shutoff valve chalwin type
	Standard oil filter	Intake air heater
	Low coolant level sensor	Oil temperature sensor
	Exhaust gases compensator	Diesel-powered heater
	24V Electrical system	Engine water heater

Dimensions(Open Skid Type) With Standard Fuel Tank

- √The complete gen-set is mounted on whole on a heavy-duty fabricated,steel base frame.
- √ Antivibration pads are fixed between the engine/ alternator feet and the base frame ;
- $\sqrt{}$ Base frame design incorporates an integral fuel tank.
- √ The generating set can be lifted or carefully pushed / pulled by the base frame;
- √Dial type fuel gauge and drain plug on the fuel tank;
- √ Forklift pockets within base frame (up to 500kVA):

Dimensions(Silent Type) With Standard Fuel Tank

- √All canopy parts are designed with modular principles.
- √ Without welding assembly
- √ All metal canopy parts are painted by electrostatic polyester powder paint.
- √Thermally insulated engine exhaust system.
- √Emergency stop push button outside of canopy

Easy maintenance and operation.
